OBSERVATION INFORMATION

| Species | Date(s) Observed | Spawning | Rearing | Migration | Anadromous |
|----------------|------------------|----------|---------|-----------|------------|
| chinook salmon | 8-2-93 | X | | | X |
| | | | | | |
| | | | | | |
| | | | | | |

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Observed adult chinook salmon spawners upstream of Coal Creek & Long Creek confluence (previous documented upper limit) for a distance of ~1/2 mi to the confluence of unnamed stream. Nine live and five dead chinook salmon were seen. The 1993 summer was characterized as a "low-flow" year.

Name of Observer (please print) Dennis G. Gnath (Cevin Gilleland - present)

Date: _____ Signature: [Signature] ADF/G/H&R

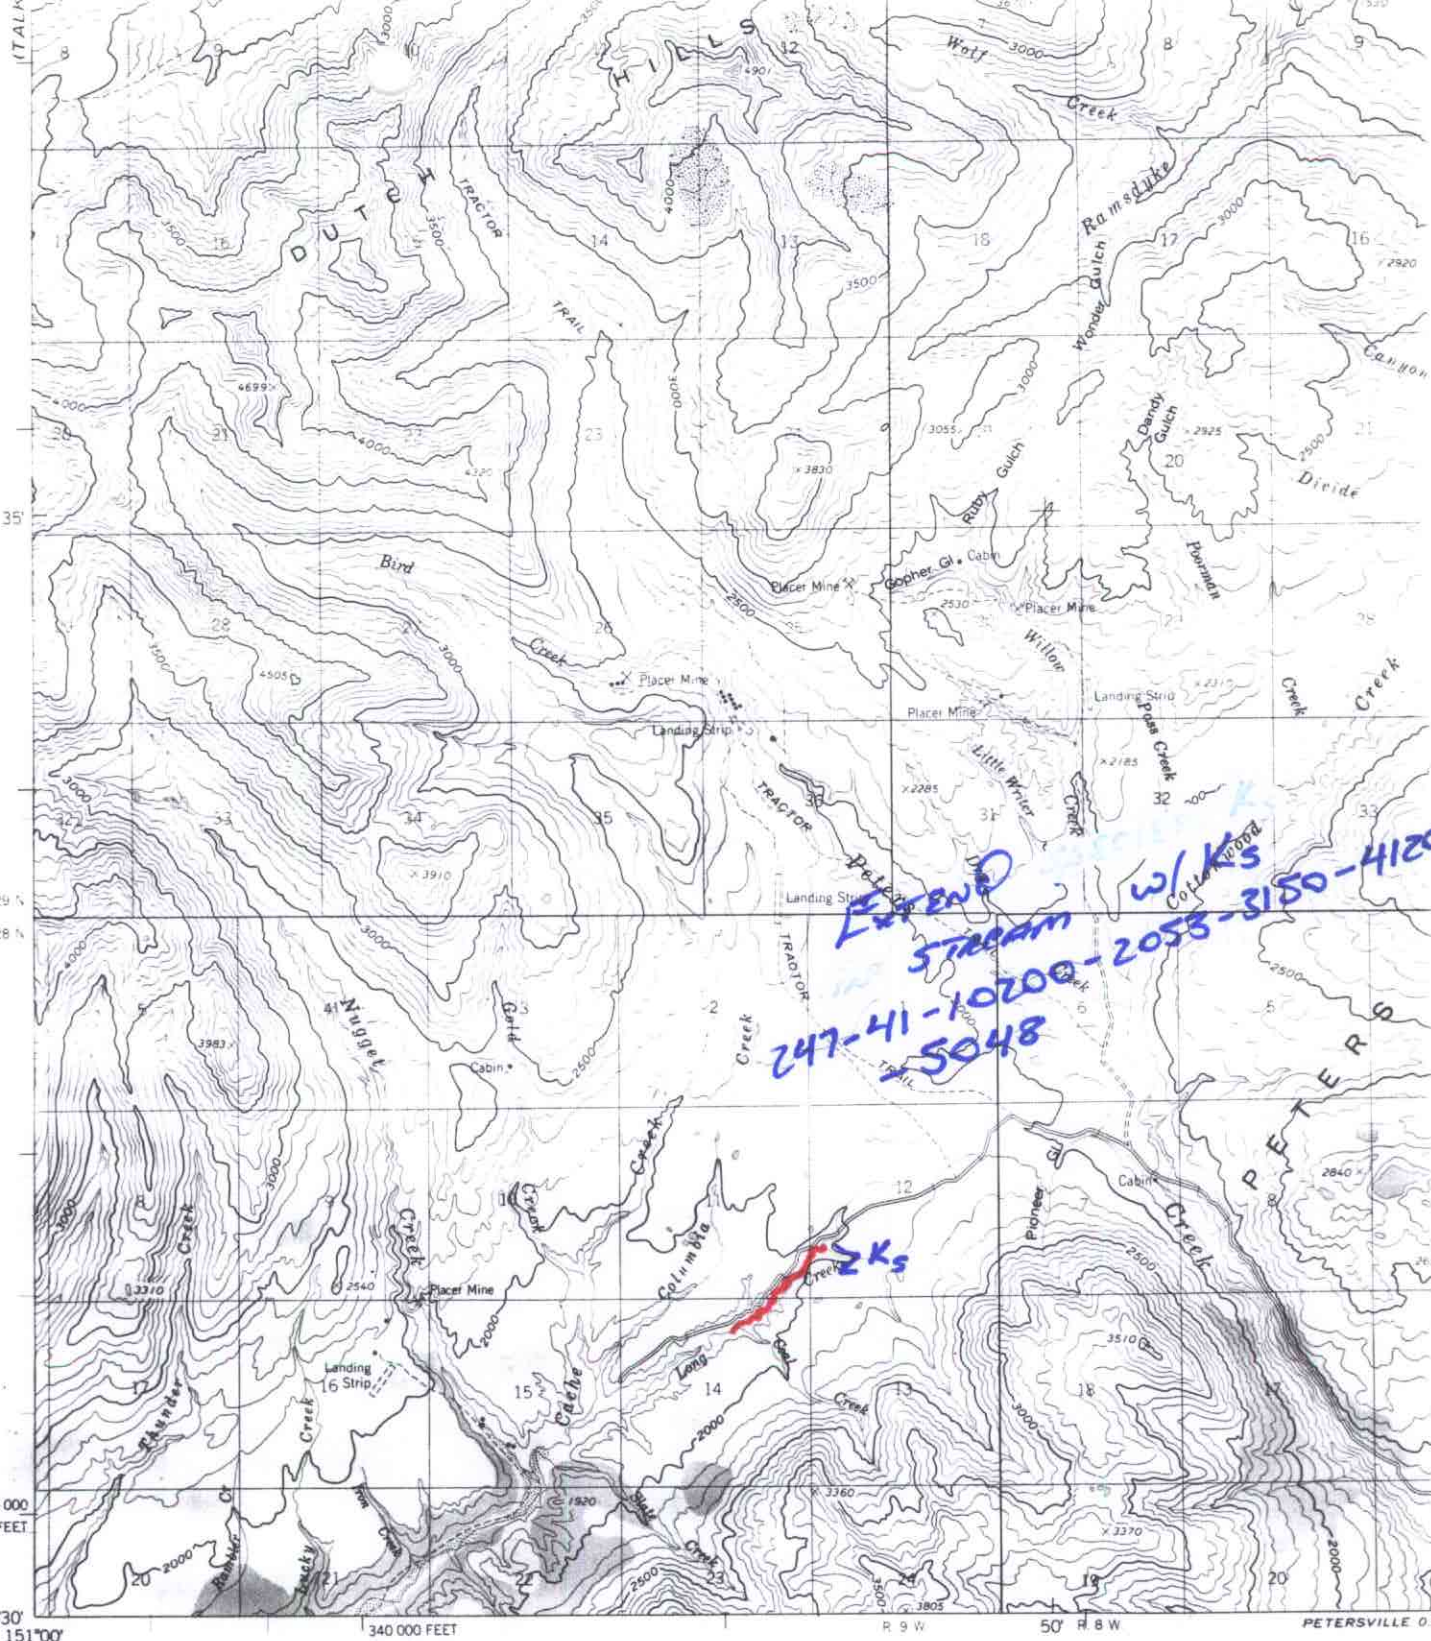

Address: 333 Raspberry Road

Anch., AK 99518-1599

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: _____

Rev. 7/93

Maped, edited and published by the Geological Survey

Control by USGS and USC & GS

Topography by photogrammetric methods from aerial photographs taken 1953-1954. Field annotated 1958. Map not field checked

Universal Transverse Mercator projection, 1927 North American datum

10,000-foot grid based on Alaska coordinate system, zone 4

1000-meter Universal Transverse Mercator grid ticks,

zone 5 shown in blue

Gray land lines represent unsurveyed and unmarked locations predetermined by the Bureau of Land Management.

Folio S-2, Seward Meridian

Swamps, as portrayed, indicate only the wetter areas, usually of low relief, as interpreted from aerial photographs
